Attachment to Advisory Action

In the proposed After Final response filed on February 25, 2008, the applicant(s) again argue that the very same claim limitations, as presented in the amendment filed on October 8, 2007, are not met by the prior art. The applicant(s) arguments directed to the issues regarding the claim construction of the preamble, P1, P2 flux shaping layer, and P3, are not found to be persuasive because these arguments have done nothing to change the examiner's position from the examiner's remarks (which are again fully incorporated by reference herein) in the Final Rejection on December 26, 2007.
